GoTrade Equity Research — IC Summary, one page

ENTRANT Weak Buy T48 positive-carry floor, confirmatory path — edge +5.5% primary and +6.5% fallback, positive on both routes; inside the T28 none bucket, paid on drift		HOLDER Hold undiscounted basis — return +17.0%; the model expects an absolute gain, and priced-for-perfection is a hold, not a trim	
SPOT \$161.34 close prior day	WEIGHTED PV \$170.15 not a target price	UNDISCOUNTED \$188.68 holder basis	BEAR-BULL SPREAD \$71.56 42.1% of PV

No variant view: the build lands +1.1% from the priced anchor and -0.2% from the freshly retrieved FY2027 consensus — a confirmatory model. The catalyst book is 1.82% of base NTM revenue, below the materiality gate, so what carries value is the adjusted operating margin near 29.1% and the 27.5x forward multiple. The positive edge is the one-year roll of that margin at a held multiple, worth +\$24.77 per share before the -\$18.53 discount leg — and with the breakevens inside model noise on the margin dial, the entry case is the T48 positive-carry floor, not a separable mispricing.
