|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------|
| <div> ENTRANT </div> <div> Weak Buy </div> <div> T48 positive-carry floor, confirmatory path — edge +2.6% primary and +3.7% fallback, positive on both routes; inside the T28 none bucket, paid on drift </div> |                                                                                | <div> HOLDER </div> <div> Hold </div> <div> undiscounted basis — return +13.3%; the model expects an absolute gain </div> |                                                                             |
| <div> SPOT </div> <div> \$205.03 </div> <div> close prior day </div>                                                                                                                                            | <div> WEIGHTED PV </div> <div> \$210.40 </div> <div> not a target price </div> | <div> UNDISCOUNTED </div> <div> \$232.37 </div> <div> holder basis </div>                                                 | <div> BEAR-BULL SPREAD </div> <div> \$52.88 </div> <div> 25.1% of PV </div> |

No variant view: the build lands +1.3% — in line under T11 against the priced anchor and -0.15% against the freshly retrieved, independent FY2027 revenue consensus — a confirmatory model. In-window catalyst revenue is 1.76% of base, below the materiality gate, so the value carriers are the adjusted operating margin near 22.2% and the 16.4x forward multiple. The small positive edge is the one-year roll at a held multiple, worth +\$21.13 per share before the -\$21.97 discount leg — and with the breakevens inside model noise on the margin dial, the entry case is the T48 positive-carry floor, not a separable mispricing.

EXHIBIT 1 THE DISTRIBUTION — SCENARIO ARMS AGAINST SPOT, PROBABILITY-WEIGHTED

Source: bank S9/S10. A probability-weighted expectation under stated assumptions, not a target price.

WHAT ENDS IT — KILL SWITCHES (NONE FIRED)

| SWITCH                       | TEST                                                                        | STATUS            |
|------------------------------|-----------------------------------------------------------------------------|-------------------|
| 1 Q4/FY27 anchor miss        | Q4 revenue below \$4,988M (>5% vs guide) or adjusted EPS below \$2.81 (>8%) | armed             |
| 2 Astrodyne slip             | Not closed by 31 Dec 2026                                                   | armed             |
| 3 Revision reversal          | FY2027 consensus falls for two consecutive marks                            | armed at baseline |
| 4 Moat proof downgrade       | Adjusted operating margin <21.0% with book-to-bill <1.0x                    | armed             |
| 6 True-driver switch (added) | Adjusted operating margin <21.0% in any FY2027 quarter                      | armed             |
